

CNC Programmer - Machinist

- Hands-On role. From drawing to finished part.
- Varied work in precision parts
- Excellent working conditions
- Both CNC Milling and CNC Mill-Turn roles available

QPE provides high quality precision machined components to high profile clients in high end industries. Due to the on-going, high demand for our services, (particularly prototypes and project work), we are seeking experienced CNC Machinists / Programmers to join our team.

Successful new team members will:

- Be involved in the hands-on programming and manufacture of a wide range of interesting components using ideally either POWERMILL or FEATURECAM software.
- Be responsible for ensuring that all parts conform with company specifications and quality procedures
- Be given opportunities to develop their role and grow with the company
- Identify and implement improvements
- Be proactive, customer focussed and responsive
- Have high level experience programming and operating CNC Mills and/or CNC Lathes preferably on Multi-Axis Machines. QPE has Heidenhein (Mikron), ISO/G-Codes (Hass, Fanuc, Mori Seiki), Mazatrol (Integrex)
- A 'hands-on' attitude with excellent communication skills

Excellent wages coupled to ample overtime available.
